# Summary Report: Felony and Misdemeanor Cases Circuit Court

### **Project Overview**

The goal of the ECCM project is to discover, document, and disseminate effective criminal case management practices in state trial courts to help reduce delay and cost and improve the quality of justice. More than 90 courts are participating. Case-level information from the most recent 12-month period available was collected from each court for disposed felony and/or misdemeanor cases.

### **Case Types**

Cases were classified into a set of case types determined by the most serious charge at filing. In order of severity, the case types are:

- Homicide (e.g., murder, manslaughter)
- Person offense (e.g., assault, robbery)
- Property offense (e.g., burglary, larceny)
- Drugs (e.g., manufacture, sale, use)
- Weapons (e.g., illegal possession)
- Driving While Intoxicated (e.g., DUI)
- Other motor vehicle (e.g., reckless driving)
- Legal process (e.g., bail, probation violation)
- Public order (e.g., disorderly conduct, vagrancy)
- Other felony/other misdemeanor

### **Case Counting Rules**

A case is defined as a single defendant and all charges arising from a single incident. The data set includes a single record for each case. For cases involving multiple charges against a single defendant, the data was condensed to produce a single record based on the most serious charge at filing and disposition.

### **Active Time to Disposition**

The recommended measure of case processing time excludes those time periods over the life of a case where the case is out of court control and no progress can be made (inactive time). For criminal cases this typically arises when a defendant fails to appear in court. When possible, we show active time to disposition, calculated by subtracting the inactive time from the total case processing time.

### **Jackson Court Description**

Population of County (2015): 687,623

Population Rank: 92nd largest by population of the 3,142 U.S. counties Type of Court & Data Available: Single-tier/felony and misdemeanor data

Judge Selection: Gubernatorial appointment - Retention election

### Measuring Case Processing Time using the National Model Time Standards

#### **Felonies**

90% within 180 days 98% within 365 days **Misdemeanors** 

90% within 90 days 98% within 180 days

Time standards set expectations for timely case processing and provide a benchmark for assessing court performance. The National Model Time Standards (NCSC, 2011) for felony and misdemeanor cases are used here to provide time goals for resolving 90% and 98% of cases. In addition, the *mean* (average) and *median* (midpoint) days to disposition give insight into the more typical time taken to resolve cases. The *overall mean* for all ECCM sites is also included for comparison. When the % of cases within 90/180/365 days are the same, only one value is shown.

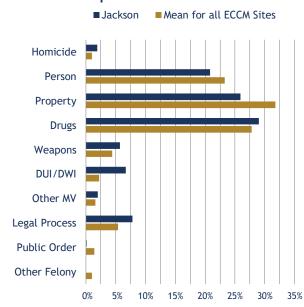

### **Circuit Court - Felony Cases**

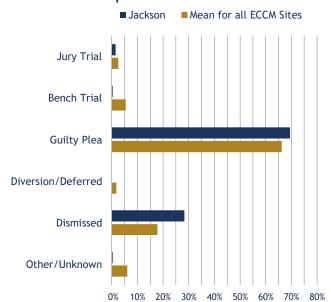

Total Felony Cases: 3,658

#### **Caseload Composition**

#### Manner of Disposition

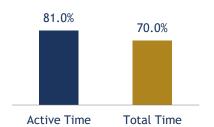

### Active Time from Filing to Disposition

All ECCM Sites in Missouri

		% within	% within	Mean #	Median #
County/Site_	Total Cases	<u>180 days</u>	<u>365 days</u>	of days	<u>of days</u>
City of St. Louis	3,850	63%	88%	179	118
Clay	1,140	68%	90%	218	118
