

CSP

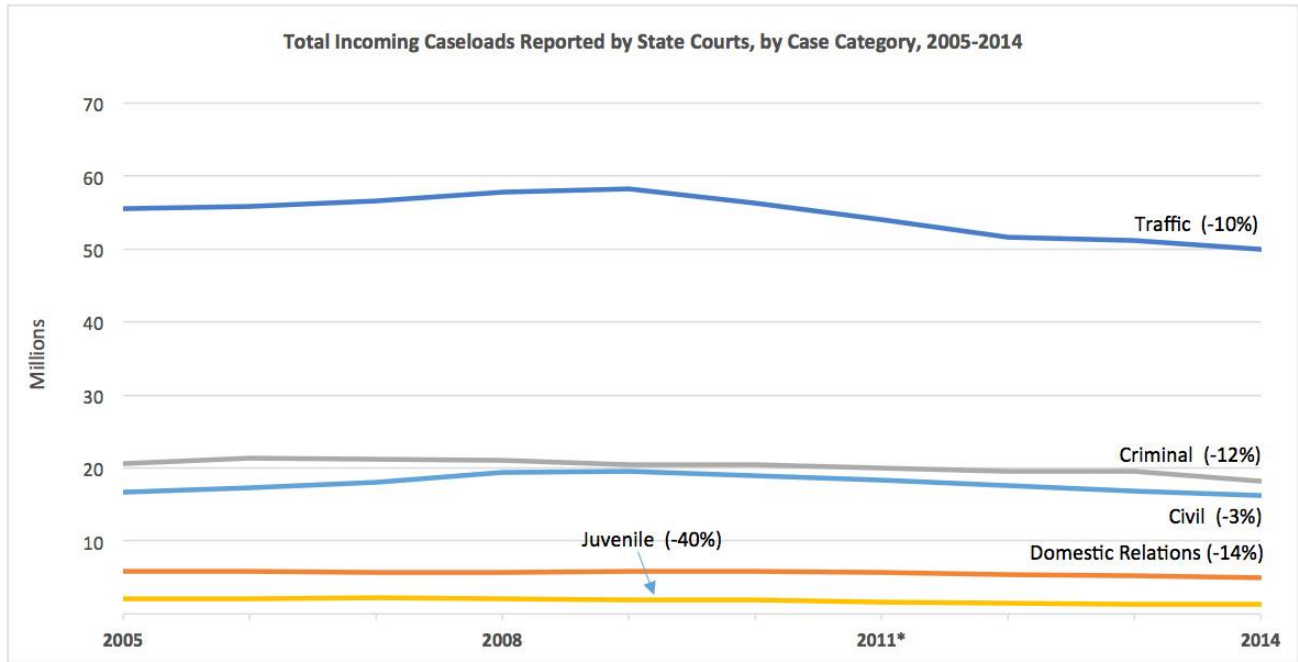

Court Statistics Project

2014 Data Summary

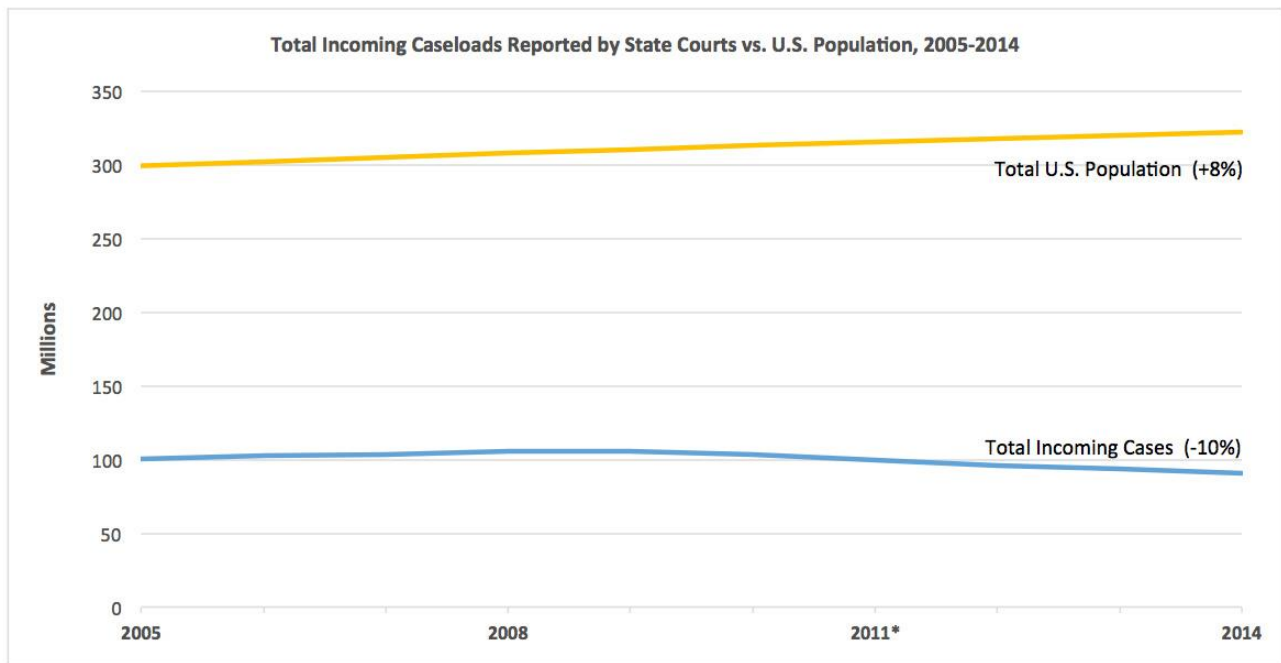

Since the next *Examining the Work of State Courts* will be published at the end of the year after the 2015 data collection, we have created the charts below using the latest data collection. Please note that no data collection was done for 2011 trial court data and that the data is as reported to the National Center for State Courts. For state-level and specific case type data the [CSP DataViewer](#) is an interactive tool that allows users to filter, sort, and export data of interest.

* As no data were collected for 2011, the value used for 2011 data is the average of 2010 and 2012 data.

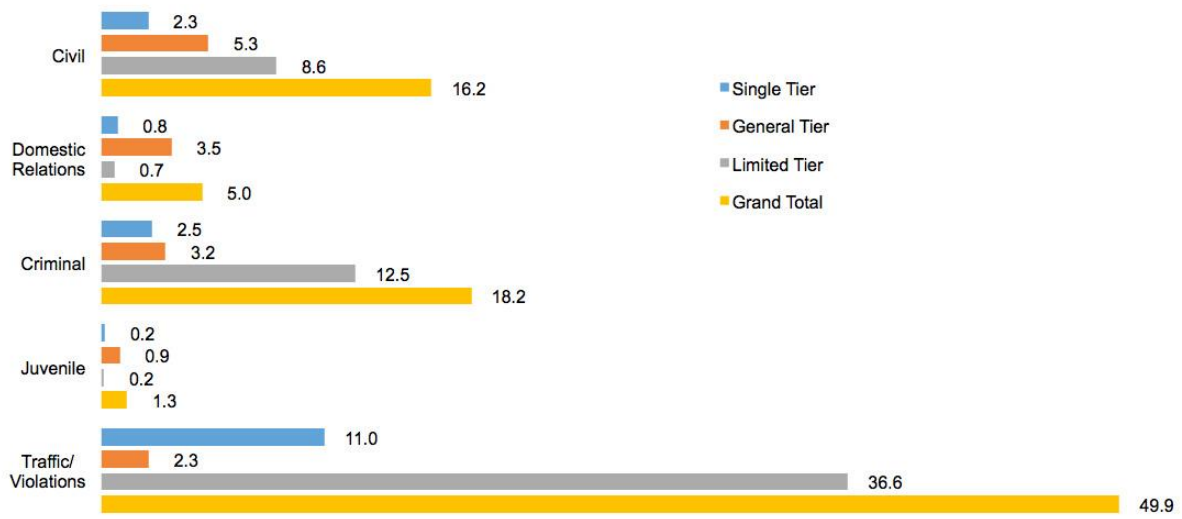

* As no data were collected for 2011, the value used for 2011 data is the average of 2010 and 2012 data.

* As no data were collected for 2011, the value used for 2011 data is the average of 2010 and 2012 data.

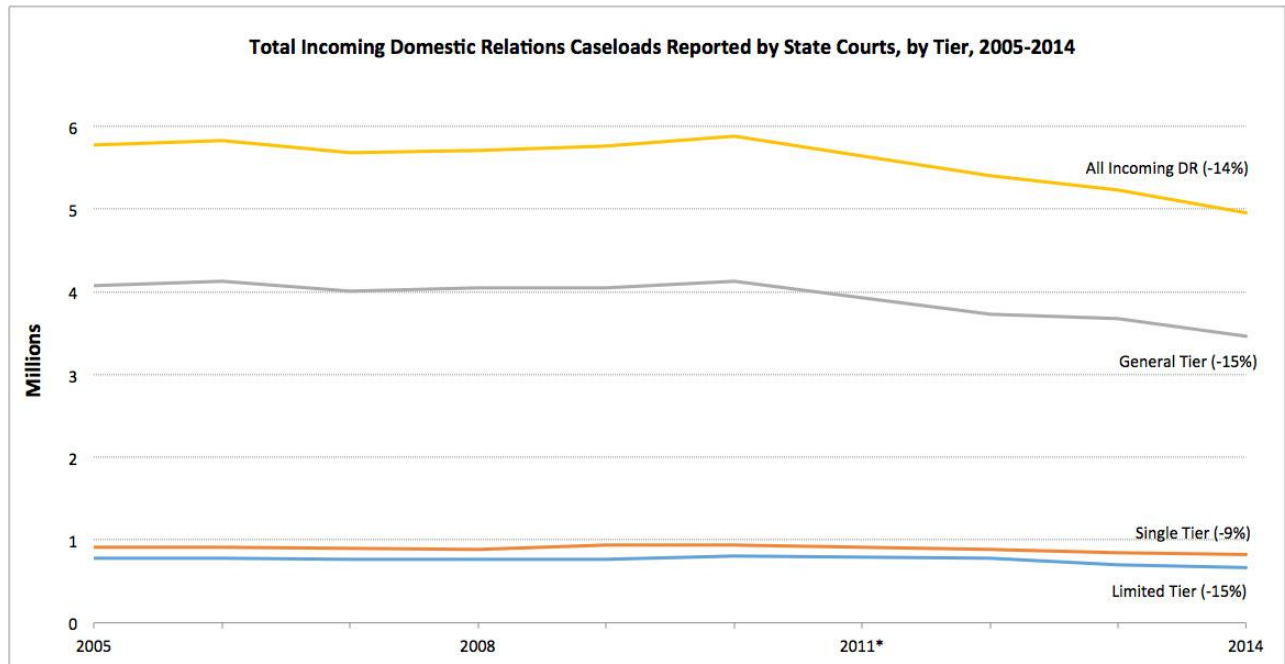

Total Incoming Caseloads Reported by State Courts, by Case Category and Tier, 2014 (in millions)

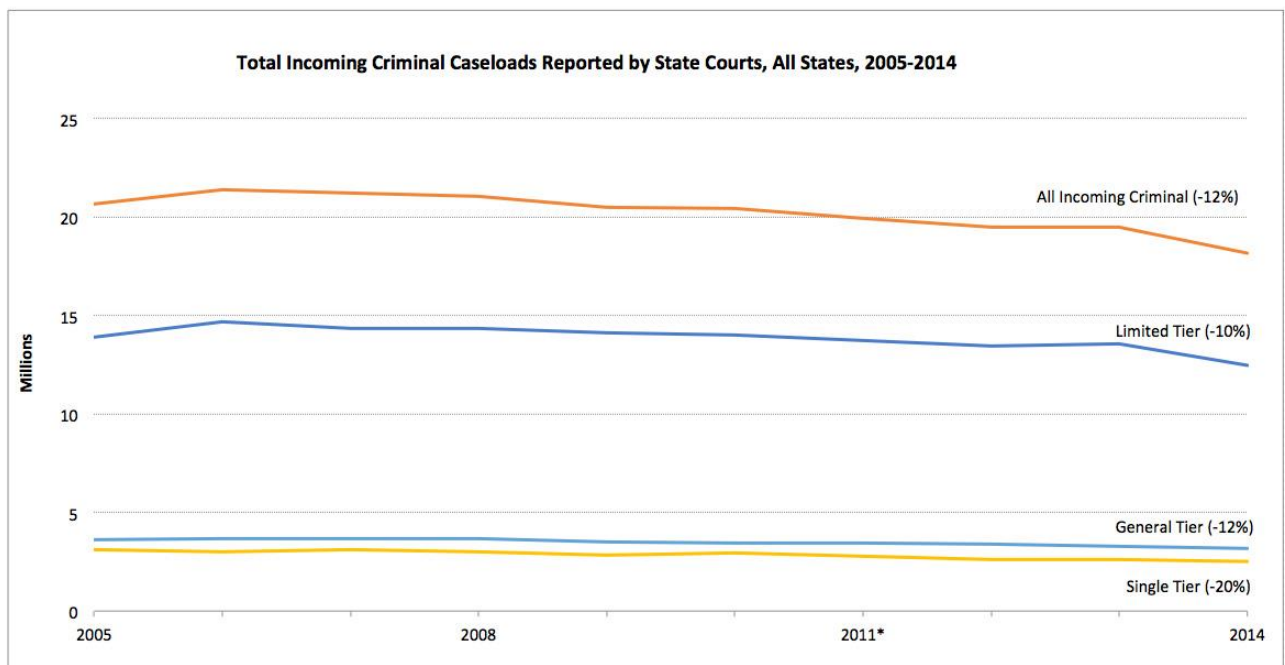

Total Incoming Civil Caseloads Reported by State Courts, by Tier, 2005-2014

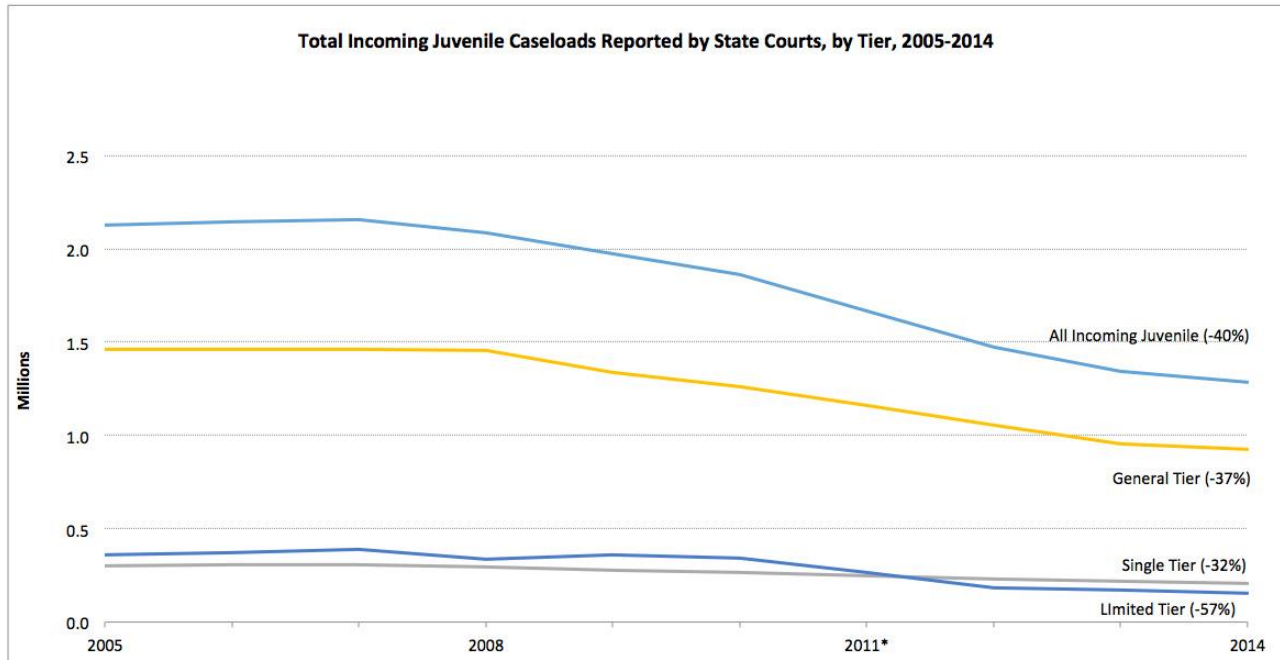

* As no data were collected for 2011, the value used for 2011 data is the average of 2010 and 2012 data.

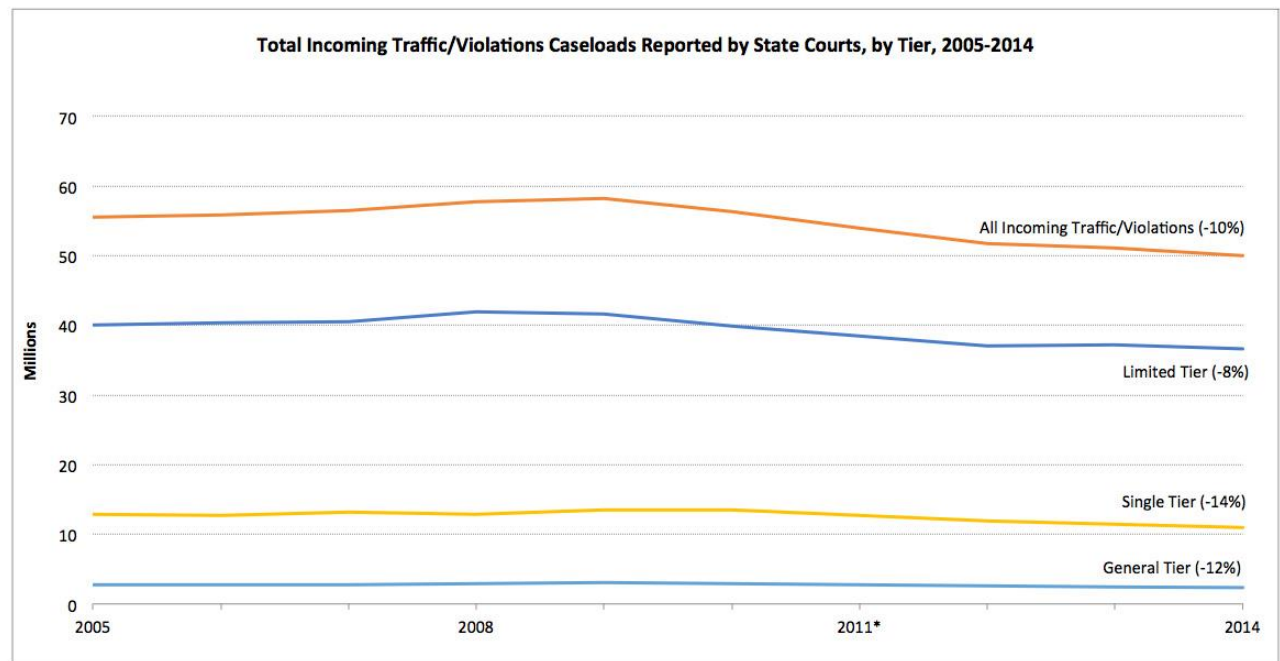

* As no data were collected for 2011, the value used for 2011 data is the average of 2010 and 2012 data.

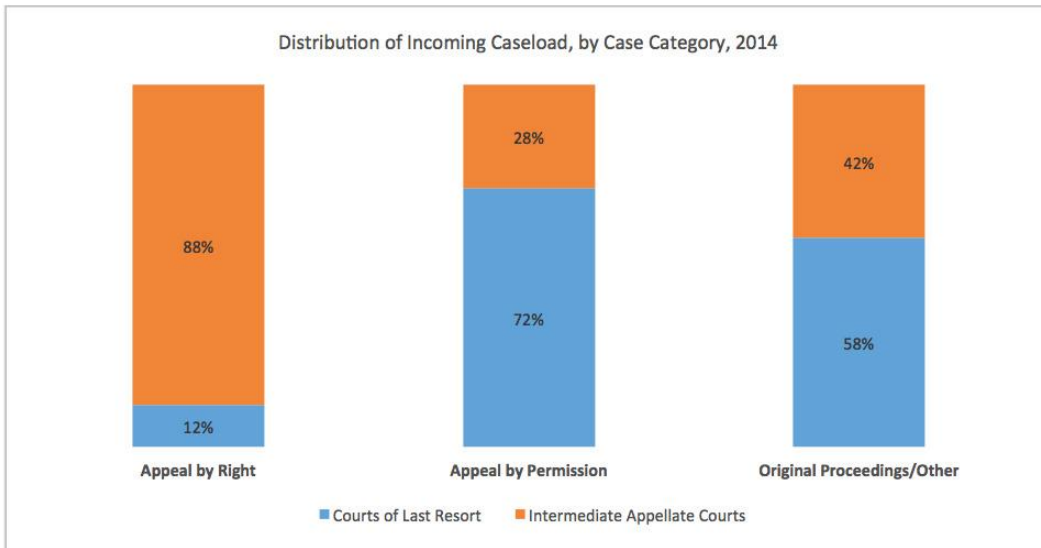

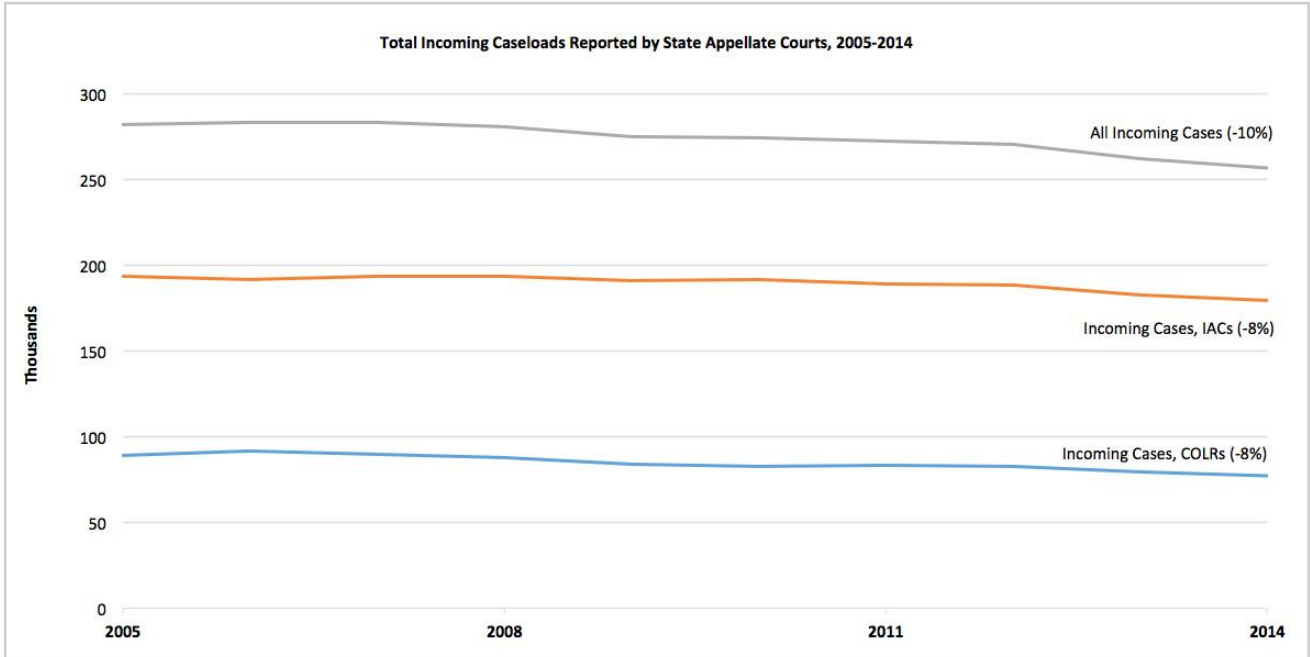

* As no data were collected for 2011, the value used for 2011 data is the average of 2010 and 2012 data.

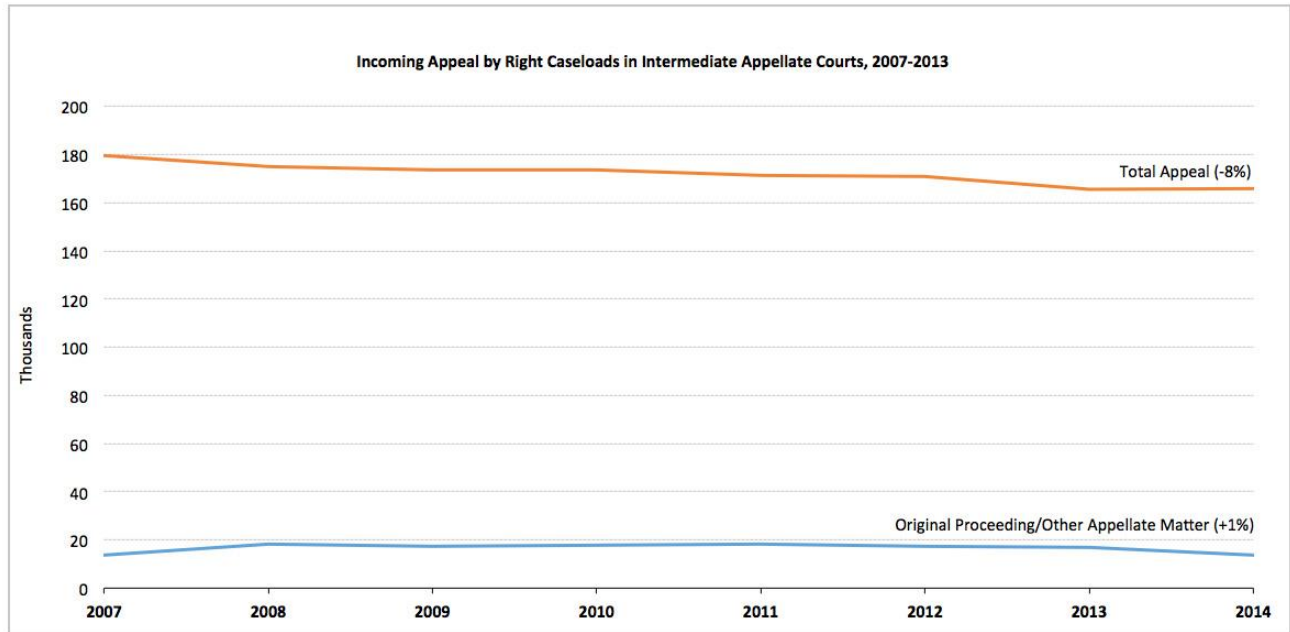

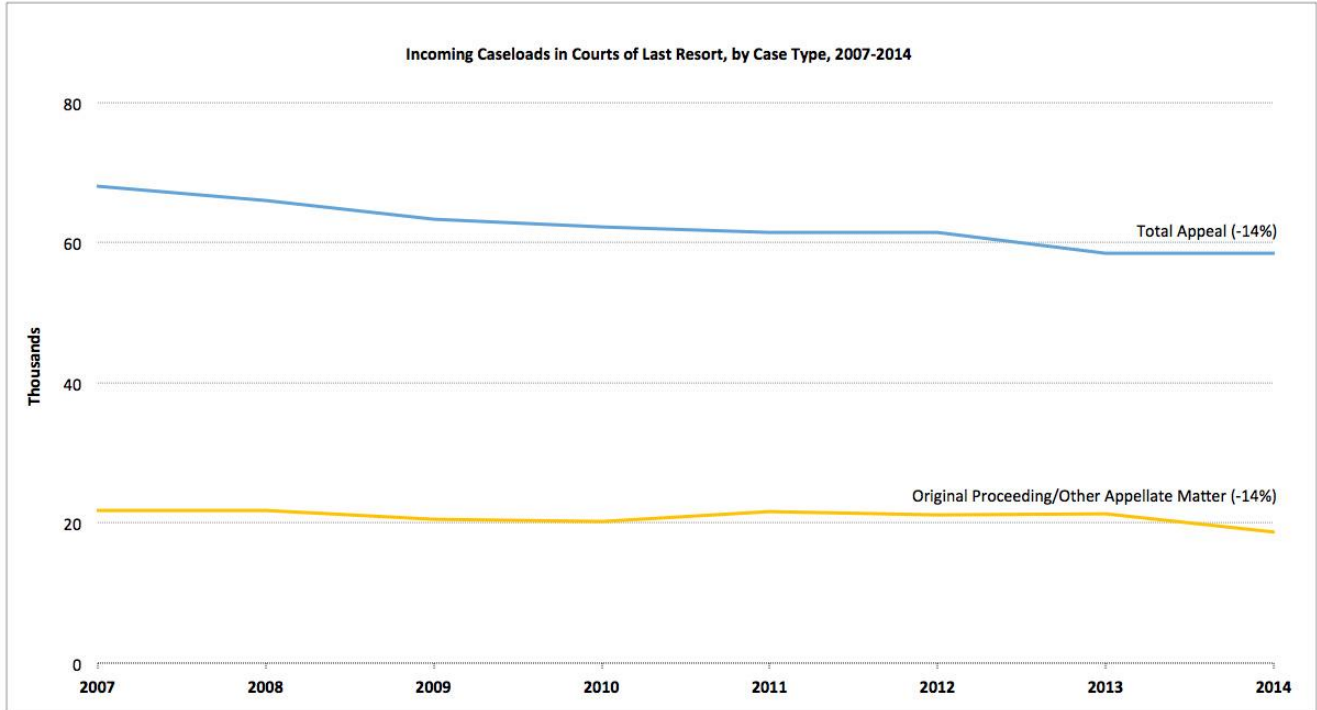

* As no data were collected for 2011, the value used for 2011 data is the average of 2010 and 2012 data.

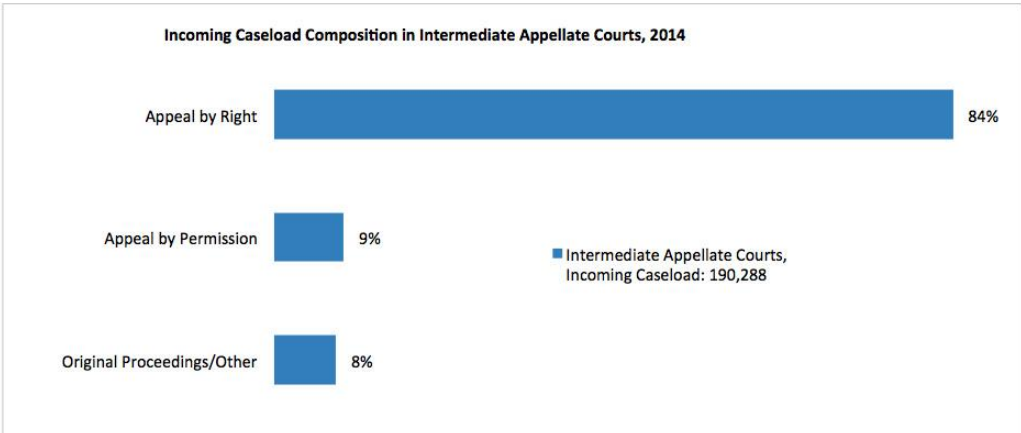

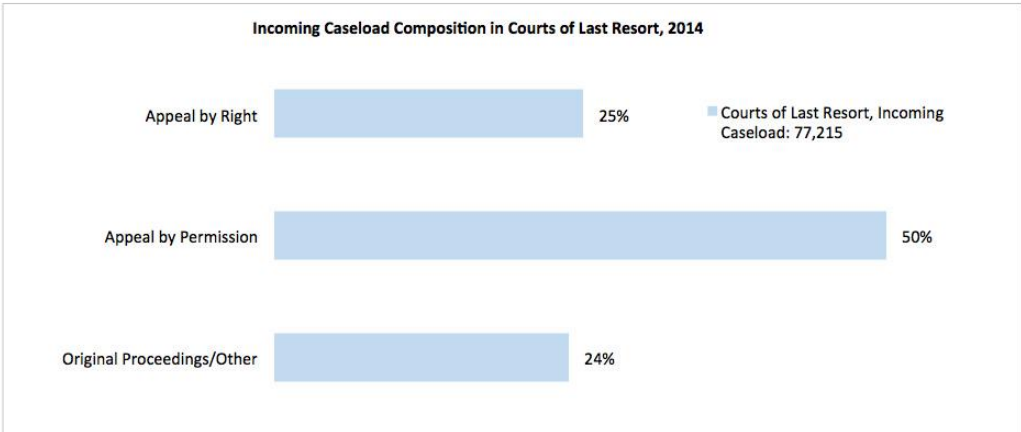

* As no data were collected for 2011, the value used for 2011 data is the average of 2010 and 2012 data.
